(440) 506 - 4343

Chicago, IL
<https://www.linkedin.com/in/evan-kelch>

Education

Purdue University West Lafayette, IN
Bachelor of Science – Planetary Science

Aug 2017 - May 2022

Languages & Frameworks

Java, Typescript/Javascript, React, Angular, Svelte, Git, SQL, MongoDB, Kubernetes, Jenkins

Career

Salt Shed, Concessions Crew

Apr 2026 - Present

JP Morgan Chase, Software Engineer II

Oct 2023 - Nov 2025

Revature - JP Morgan Chase Contract, Software Engineer

Dec 2022 - Oct 2023

Revature, Software Engineer Training

Aug 2022 - Nov 2022

Professional Projects (JPMC)

Graphite Reference Data Management Java/SQL/Kubernetes

- Maintain and provide support for critical infrastructure responsible for processing \$6T+ per day
- Integrate parameterized monitoring API to track database and backend throughput with CRON
- Deploy monthly releases with Jenkins pipelines and Kubernetes clusters on internal cloud

Legal Ease Java/React/Typescript/MongoDB

- Implement and extend React libraries to create draggable & resizable containers for app content
- Host over 20 internal and vendor apps communicating via module federation and iframes
- Create REST endpoints to persist user configured state - unit tested with JUnit & Mockito

Signing Authority Java/Angular/Typescript/SQL

- Automate mapping of authority with LLM parsed documents for over 5,000 legal entities
- Create admin tools for manual review, editing, or rejecting rules prior to final approval
- Integrate custom AgGrid renderers to display large sets of user-interactive data sets

Personal Projects

Carplay C/SDL2

December 2024 - January 2025

- Render custom 2D graphic interface to control music playback and personalize user interface
- Implement lists, hashmaps, and other data structures required for cataloguing and sorting songs
- Perform OS cross-compatible syscalls to read and categorize input files

evankel.ch Svelte/Typescript

October 2024 - Current

- Develop personal SPA with routing and reusable components with SvelteKit
- Configure Cloudflare hosting of app automatically deployed on pushes with Git hooks
